

## **Summary of FY23 PILOT Community Benefits**

As outlined by the 2011 PILOT Taskforce, PILOT Community Benefits are broadly defined as services that directly benefit City of Boston residents; support the City's mission and priorities with the idea in mind that the City would support such an initiative in its budget if the institution did not provide it; emphasize ways in which the City and the institution can collaborate to address shared goals; and, are quantifiable. Lastly, PILOT Community Benefits should include only those investments that are above and beyond the institution's existing commitments such as Institutional Master Plan requirements, Article 80 requirements, Determination of Need and the like.¹ Examples of PILOT Community Benefits programs include academic scholarships, job training initiatives, health disparities programs. More detailed examples of FY23 Community Benefit programs can be found below.

In FY23, <u>39 institutions</u> submitted PILOT Community Benefits reports totalling \$219.8M, of which \$183M was considered eligible. Given that an institution can only receive community benefits credit for 50% of its PILOT request, <u>\$62.1M in community benefits credit was accepted</u> in total this year. Institutions partnered with approximately <u>350 local organizations</u> to implement these programs.

Last year, in the fourth year of providing a Community Benefits summary, 39 institutions submitted PILOT Community Benefits reports with \$156.4M in eligible community benefits and received \$56.9M in community benefits credit. Institutions partnered with over 350 local organizations to implement these programs. For comparison, only 27 institutions submitted community benefits reports in FY17 and no summary was provided.

To better understand the impact of PILOT Community Benefits across the city, this year's submissions were broadly categorized. The following categorization is a preliminary assessment based on the information provided about each Community Benefit by our partner institutions. All submitted Community Benefits were categorized, with the exception of some programs which require more information before making an assessment. Please note that additional benefits to the community through Institutional Master Plan requirements, Article 80 requirements, Determination of Need and other means are not accounted for in this analysis.

<sup>&</sup>lt;sup>2</sup> Please note that FY19 was the first year that Community Benefits Programs were categorized.

<sup>\*</sup>These FY19 values have been adjusted given an error in last year's reporting on community benefit submissions. Harvard University's Arnold Arboretum now falls under the Built Environment category (in FY19, it was erroneously placed in the Cultural category).

To further understand the impact of PILOT Community Benefits across the city, institutions also submitted information about the neighborhoods served by every program. The following neighborhood categorizations are a preliminary assessment based on the information provided about each Community Benefit program by our partner institutions. Please note that some programs serve multiple neighborhoods; for those programs, the reported value of that program is counted in each neighborhood served. 73% of programs served residents citywide and 81% of the total reported value of PILOT Community Benefits were citywide.
