1971-03	5/3/1971	Pland to beat the impression of the seals of registered professional Architects, Structural Engineers, Mechanical Engineers, and Electrical Engineers				Robert Thuma Jr.
1971-01	4/2/1971	"Controlled Concrete"	Amended by CB #179A			Robert Thuma Jr.
1969-01	2/28/1969	Operation of Passenger Elevators in case of Fire				Robert Thuma Jr.
1968-01	3/25/1968	Elevator, Dumb-waiter and Escalator Regulations			C.479, Acts 1938, Sec.116 (G)	Robert Thuma Jr.

1967-04	5/2/1967	Ultimate Strength Design- Structural Analysis and Proportioning of Members			BBC, Part 26, Sec. 2601 and Sec. 116 (L)	Robert Thuma Jr.
1967-03	4/10/1967	PYREX brand acid-waste drainline with Bury-Pac (TM) Casing			C.479, Acts 1938 as amended Sec.116 (L)	Robert Thuma Jr.
1967-02	3/20/1967	Dur-O-Wal Truss Design Joint Reinforcement in Masonry Walls				
1967-01	3/20/1967	Watts # 8, 8A, 8C, and LF9 back-siphonage back-flow preventer. The #8 and LF9 series preventers are suitable for hot and cold water service, inside or outside use. All working parts are of stainless steel. The device contains an atmospheric venting feature which allows water to spill in the event the water supply pressure becomes negative. The purpose of this device is to prevent the flow of contaminated or questionable water back into the potable water supply piping.			C.479, Acts 1938 as amended Sec.116 (L)	Robert Thuma Jr.
1965-01	1/29/1965	Victaulic Couplings Style 31, 77, and 75 with housing fabricated in two or more parts of malleable iron castings in accordance with Federal Specifications QQ-I-666c, Grade II. Coupling gasket shall be Victaulic Grade "H" molded synthetic rubber, per ASTM-D735-61, Grade #R615BZ. Coupling bolts shall be oval neck track head type with hexagonal nuts, per ASTM A-183-60.			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1964-18	11/9/1964	Bonding and Grounding System for Aluminum Sidings. (Lightning-Lok-Electrical Grounding System)			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1964-17	10/26/1964	Victaulic Couplings Style 31, 77, and 75 with housing fabricated in two or more parts of malleable iron castings in accordance with Federal Specifications QQ-I-666c, Grade II. Coupling gasket shall be Victaulic Grade "H" molded synthetic rubber, per ASTM-D735-61, Grade #R615BZ. Coupling bolts shall be oval neck track head type with hexagonal nuts, per ASTM A-183-60.	Rescinded		C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1964-16	7/7/1964	A nonbearing wall assembly consisting of 2 1/2 inch wide steel studs supported at the top and bottom with steel runners, faces both sides with 1/2 inch thick gypsum wallboard, with the interior air space filled with mineral wool batts			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1964-15	6/12/1964	A floor and ceiling assembly composed of a concrete floor supported by steel cellular type floor units, composed of upper and lower fluted section welded together to form full cell sections, and steel beams protected by sprayed fiber (Spraycraft) applied directly to the steel surfaces			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1964-14	6/1/1964	A structural steel building column protected by sprayed fiber ("Pyrospray") applied directly to a tamped depth of 2-3/4"			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1964-13	6/1/1964	A floor and ceiling assembly composed of a concrete floor supported by a blend of cellular and fluted-steel form units and a steel beam, protected by sprayed fiber ("Pyrospray") applied directly to the steel surfaces			C.479, Acts 1938 as amended Sec.116 (L)	Robert York

1964-12	6/1/1964	A floor and ceiling assembly composed of a concrete floor supported by a blend of cellular and fluted-steel form units and a steel beam, protected by sprayed fiber ("Pyrospray") applied directly to the steel surfaces			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1964-11	6/1/1964	A floor and ceiling assembly consisting of a 2 1/2-inch thick concrete topping on cellular steel floor units supported by a steel beam and protected by a suspended ceiling consisting of 3/4" thick acoustical tile (U.S.G Airson Acoustone "120") with light fixtures recessed into boxes formed of mineral wool batts			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1964-10	6/1/1964	A floor and ceiling assembly composed of a concrete floor supported by combined cellular and fluted steel floor units (Fenestra) and a steel beam, and protected by sprayed fiber (Spraycraft) applied directly to the steel surfaces			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1964-09	6/1/1964	A floor and ceiling assembly composed of a concrete floor, a blend system of fluted and cellular-steel form units, trench header duct, and a steel beam, protected with a sprayed fiber (Spraycraft) applied directly to the undersurface of the form units and directly to the surfaces of the beam			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1964-08	5/25/1964	A structural steel column protected by sprayed fiber (Spraycraft) applied directly to the steel to a tamped depth of 3 inches			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1964-07	5/25/1964	A floor and ceiling assembly composed of a 2 1/2-inch thick concrete topping supported by a blend system of fluted and cellular steel floor units (Inland Steel Products Co. "Hi Bond,") and steel beams, protected by sprayed fiber ("Spraycraft") applied, over a coating of adhesive, directly to the exposed surfaces, following the contours of the decking and beams			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1964-06	5/25/1964	A structural steel column protected by sprayed fiber (Spraycraft) applied directly to the steel to a tamped depth of 2 inches			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1964-05	5/22/1964	A floor and ceiling assembly composed of a 2 1/2" thick concrete topping supported by cellular steel floor units and steel beams protected by sprayed fiber applied directly to the steel surfaces			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1964-04	5/11/1964	A floor and ceiling assembly composed of a 2 1/2-inch thick concrete topping, supported by cellular steel floor units (Fenestra D deck) and steel beams, protected by sprayed fiber (Spraycraft) applied over a coating of adhesive directly to the exposed surfaces, following the contours of the decking and beams			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1964-03	5/11/1964	A floor and ceiling assembly composed of a 2 1/2-inch thick concrete topping, supported by cellular steel floor units (Inland Steel Products) and steel beams employing a trench header for electrical wiring and protected by sprayed fiber (Spraycraft) applied over a coating of adhesive directly to the exposed surfaces, following the contours of the decking and beams			C.479, Acts 1938 as amended Sec.116 (L)	Robert York

1964-02	5/11/1964	A floor and ceiling assembly composed of a 2 1/2-inch thick concrete topping, supported by a blend of cellular and fluted steel floor units (Inland Steel Products) and steel beams, protected by sprayed fiber (Spraycraft) applied over a coating of adhesive directly to the exposed surfaces, following the contours of the decking and beams			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1964-01	1/30/1964	A lightweight precast tongue and groove 2" steel edge concrete a plank known as Creteplank for use in floor and roof decks as manufactured by the Martin Fireproofing Corporation			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1964	1/27/1964	Insulating Nailable Sheeting (1/2" x 48" x 8'-0" or 9'0")			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1963-27	10/11/1963	A floor and ceiling assembly consisting of a 2 1/2-inch thick concrete floor supported by open-web steel joists protected with a 3/4-inch thick acoustical-board ceiling			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1963-26	10/11/1963	A floor and ceiling assembly consisting of a 2-inch thick concrete floor supported by open-web steel joists protected with a 3/4-inch thick acoustical-board ceiling			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1963-25	10/11/1963	A floor and ceiling assembly consisting of a 2-inch thick concrete floor supported by open-web steel joists protected with a 3/4-inch thick acoustical tile ceiling			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1963-23	8/9/1963	A floor and ceiling assembly with concrete over steel form units with provisions for electrical wiring supported by steel beams and protected with perlite spray plaster			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1963-22	8/9/1963	A floor and ceiling assembly consisting of a 2 3/4-inch thick concrete topping on cellular steel floor units, supported by steel beams and protected on the ceiling side with cementitious material. (Gold Bond Fireshield spray plaster, Type F)			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1963-21	8/9/1963	A floor and ceiling assembly consisting of a 2 1/2-inch thick concrete topping on cellular steel floor units, supported by steel beams and protected on the ceiling side with cementitious material. (Gold Bond Fireshield spray plaster, Type F)			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1963-20	7/10/1963	A floor and ceiling assembly composed of a concrete floor supported by a blend of cellular and fluted-steel form units and a steel beam protected by sprayed fiber applied directly to the steel surfaces			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1963-19	7/10/1963	Tnemec No. 99 and Tnemec No. 69 primers used for the protection of structural steel against rust			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1963-18	7/2/1963	Glass pipe drainage systems used for conveying of corrosive wastes			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1963-17	7/2/1963	A floor and ceiling assembly of a 2-inch thick concrete floor supported by open-web steel joists, protected with a 3/4-inch thick (Acoustone "90") acoustical-tile ceiling			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1963-16	7/2/1963	A floor and ceiling assembly of a 2 1/2-inch thick concrete floor supported by open-web steel joists, protected with 3/4-inch thick (Acoustone "120") acoustical-tile ceiling			C.479, Acts 1938 as amended Sec.116 (L)	Robert York

1963-15	7/2/1963	A 4 1/2-inch thick, non load bearing partition constructed of 2 1/2-inch steel studs with 3/8-inch thick perforated rocklath screwed to the studs and 1/2-inch thick sanded plaster (1:2 mix), on each side			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1963-14	7/2/1963	A floor and ceiling assembly consisting of 2 1/2" inch thick concrete floor supported by open-web steel bar joists protected by 5/8" thick labeled gypsum wallboard ceiling			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1963-13	7/2/1963	An unprotected gypsum concrete rock deck, composed of bulb T-railst, 1/2-inch gypsum formboard wire mesh reinforcement, and 2 1/2-inch gypsum concrete			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1963-12	7/2/1963	U.S.G sheathing as manufacturing by the U.S Gypsum Co. (1/2" x 24" x 8'-0" or 1/2" x 48" x 8'-0" or 9'0")			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1963-11	5/22/1963	Cofar composite floor and roof construction as manufactured and engineered by the Granco Steel Product Company; Granite City, Illinois			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1963-10	5/22/1963	Approval for use of Hi-Stress flexicore floor and roof slabs			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1963-09	5/16/1963	Inland Hi-Brand (missing front page)			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1963-03	1/24/1963	A floor system composed of 2 1/2 inch thick, concrete topping over bond steel floor units (cellular and fluted) supported by steel beams, with Gold Bond Fire-Shield Plaster spray applied directly on the exposed surfaces, following the contours of the decking and beams			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1963-02	1/24/1963	A floor system composed of 2 1/2 inch thick concrete topping on bond steel floor units (Holorib Deck & Elect- Re-form steel units) supported by steel beams with Gold Bond Fire-Shield Plaster sprayed directly on the exposed surfaces, following the contours of the decking and beams			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1963-01	1/24/1963	A floor system composed of 2 1/2 inch thick concrete topping on 3 inch cellular steel decking supported by steel beams with Gold Bond Fire-Shield Plaster sprayed directly on the exposed surfaces, following the contours of the decking and beams			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-36	8/13/1962	A 4 1/4 inch thick nonload-bearing Service Core Wall partition constructed of 1 inch thick "V" Edge Gypsum Coreboard units spaced 1 1/8 inch apart and faced with 1/2 inch thick Sheetrock gypsum wallboard panels			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-35	7/31/1962	A floor and ceiling assembly consisting of a 2 1/2 inch thick concrete topping on a 3 1/8 inch deep cellular deck (composed of top units of 18 USS gauge and #16 USS gauge bottom sheet) supported by a steel beam		Supersedes CB #52 (Expired)	C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-34	7/31/1962	Steel beams protected with 7/8 inch and 5/8 inch "Sprayed 'Limpet' Asbestos" fiber grade LW 25 applied to the steel surfaces (supporting a floor and ceiling assembly)		Supersedes CB #52 (Expired)	C.479, Acts 1938 as amended Sec.116 (L)	Robert York

1962-33	7/31/1962	A floor and ceiling assembly consisting of a 2 3/8 inch thick, concrete topping on a blend system of 1 5/8 inch deep cellular and fluted decking (the cellular composed of 18 and 16 USS gauge top and bottom respectively and the fluted 16 USS gauge) supported by a steel beam, protected on the underside with "Sprayed 'Limpet' Asbestos" fiber, Grade LW 25 applied directly to the steel surfaces		Supersedes CB #52 (Expired)	C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-32	7/31/1962	A 2 3/8 inch thick, nonload-bearing partition constructed of 1 inch solid gypsum tongue and groove core units faced on each side with 5/8 inch thick sheetrock firecode gypsum board			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-31	7/30/1962	A floor and ceiling assembly consisting of a 2 inch concrete floor supported by open-web steel joist protected by a 5/8 inch thick gypsum wallboard ceiling			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-30	7/30/1962	A 6 1/8 inch laminated nonload-bearing partition formed of two layers of labelled 5/8 inch gypsum wallboard on each face of steel studs			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-29	7/27/1962	A Vaughan Movable Solid Sheetrock 2 1/4 inch nonload-bearing partition constructed from 1 inch solid gypsum core units with 5/8 thick gypsum wallboard laminated to both faces			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-28	7/27/1962	A steel column protected with three layers of labelled 5/8 inch gypsum wallboard having a total thickness of 1 7/8 inches			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-27	7/27/1962	A 4 7/8 inch thick nonload-bearing partition constructed of U.S Gypsum 3 5/8 inch channel studs with 5/8 inch thick sheetrock Firecode wallboard, screw applied to both faces			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-26	8/17/1962	CADWELD method of butt splicing reinforcing bars			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-25	7/25/1962	CADWELD method of butt splicing reinforcing bars			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-24	7/20/1962	A 2 inch thick nonload-bearing Drywall partition constructed of 1 inch "V" edge gypsum coreboard units and faced with 1/2 inch thick Sheetrock Firecode wallboard panels			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-23	7/20/1962	A 5 3/4 inch thick nonload-bearing partition constructed of 3 1/4 inch Gold Bond nailable steel studs spaced 24 inches on center faced with double thickness laminated 5/8 inch thick Gold Bond fireshield wallboard applied to each face			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-22	7/20/1962	A 4 1/2 inch thick, nonload-bearing partition constructed of 3 1/4 inch Gold Bond nailable steel studs spaced 24 inches on center with 5/8 inch thick Gold Bond fireshield wallboard applied to each face			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-21	7/20/1962	A 4 1/4 inch thick, nonload-bearing partition constructed of 3/8 inch thick Gold Bond perforated gypsum lath stapled to 2 1/2 Gold Bond nailable steel studs with 1/2 inch thick sanded plaster (1:2 mix) applied to both faces			C.479, Acts 1938 as amended Sec.116 (L)	Robert York

1962-20	7/20/1962	A 4 inch thick, nonload-bearing partition constructed of 2 1/2 inch Gold Bond nailable steel studs with metal lath nailed to the studs and 5/8 inch thick sanded plaster (1:2 mix) measured from the face of the lath			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-19	7/20/1962	A 4 inch thick, nonload-bearing partition constructed of 2 1/2 inch Gold Bond nailable steel studs with metal lath stapled to the studs and 5/8 inch thick sanded plaster (1:2 mix) measured from the face of the lath			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-18	7/20/1962	A 2 inch thick nonload-bearing partition constructed of 1/2 inch solid gypsum plaster Baxbord core units and faced on each side with 1/2 inch thick solid sheet rock			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-17	7/20/1962	A floor and ceiling assembly composed of a concrete floor supported by a blend of cellular and fluted-steel floor units and a steel beam, electrical header ducts, and junction boxes protected by a sprayed plaster			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-16	7/20/1962	A floor and ceiling assembly composed of a blend system of cellular and fluted-steel form units, electrical header ducts and junction boxes, reinforcing bars and concrete topping protected with vermiculite acoustical plaster or plaster			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-15	7/19/1962	A floor and ceiling assembly composed of a concrete floor supported by a blend of cellular and fluted-steel floor units and a steel beam			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-14	7/18/1962	A 4 1/4 inch thick, nonload bearing partition constructed of 3/8 inch gold bond plain gypsum lath stapled to 2 1/2 inch Gold Bond nailable steel studs and 1/2 inch thick Perlite plaster (1:2 mix) applied to both faces			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-13	7/11/1962	A 4 1/4 inch thick, nonload bearing partition constructed of 3/8 inch Gold Bond perforated gypsum lath nailed to 2 1/2 inch Gold Bond nailable steel studs and 1/2 inch thick sanded plaster (1:2 mix) applied to both faces			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-12	6/29/1962	Fire-resistive ratings			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-11	7/2/1962	A floor and ceiling assembly consisting of a 2 inch concrete floor supported by open-web steel joist protected with a 5/8 inch gypsum wallboard ceiling			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-10	7/2/1962	A 4 1/4 inch thick, nonload bearing partition constructed of 3/8 inch gold bond plain gypsum lath nailed to 2 1/2 inch Gold Bond nailable steel studs and 1/2 inch thick Perlite plaster (1:2 mix) applied to both faces			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-09	6/28/1962	A floor and ceiling assembly composed of a concrete floor supported by a blend of cellular and fluted-steel floor units and a steel beam			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-08	6/1/1962	"Floor and Modified Beam Assembly"- A fire-retardant (Sprayed Limpet Asbestos) protecting the underside of steel deck floors and modified beams supporting them			C.479, Acts 1938 as amended Sec.116 (L)	Robert York

1962-07	4/12/1962	5/8 inch Firecode 60 Sheetrock Wallboard as a ceiling for the fire protection of wood joists floor construction			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-06	4/11/1962	A fire-retardant incombustible acoustical tile 24"x48"x5/8' thick			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-05	4/11/1962	A fire-retardant incombustible acoustical tile 24"x48"x5/8' thick			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-04	3/13/1962	"Asbestospray"- A fire-retardant material, composed of asbestos and other mineral fibers in proper proportions mixed with water and applied to metal surfaces			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-03	3/7/1962	"CAFRO-SPRAY" aka "Cafro Blaze-Shield," a fire retardant incombustible material used to fire-protect metal surfaces		Supercedes CB #72	C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-02	2/23/1962	Fanestra floor panel; floor system with floor panels and steel beams. Fire protected by Cafco "Blaze-Shield" plastered ceiling			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1962-01	1/12/1962	SPRAYCRAFT- a fire-retardant, incombustible material, used to fire-protect surfaces, and composed of mineral fibers, with asbestos		Supersedes CB #68 (5/17/1962)	C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1961-26	12/5/1961	"Glazon" (Prefaced Structural Masonary Units)-Lightweight Concrete Masonary units for interior bearing or nonbearing partitions			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1961-25	11/15/1961Rev	"MonoKote" (MK-3)- a fire retardant, incombustible material used to fire protect metal surfaces and composed of a proprietary cementitious mixture		Supersedes CB #83 (7/25/61)	C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1961-24	10/30/1961	"Acousti-Celotex Protectone Striatone Plaid Natural Fissured"- an incombustible fire-retardant acoustical tile 12" x 12" x 3/4" thick, with kerfed edges			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1961-23	10/18/1961	"Firecode"- a cementitious mixture for fire protection of metal surfaces. It may be either trowel-applied or spray-applied to the metal surfaces. Trowel-Applied as a millmixed plaster, it is designated as Type "S" and when it is Spray-Applied the mixture is designated as Type "D"			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1961-22	10/4/1961	Armstrong Acoustical Fire Guard- an incombustible fire-retardant tile (24" x 48" by 5/8" thick)			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1961-21	8/31/1961	An incombustible fire-retardant acoustical tile nominally 24" x 48" and 24" x 24" by 5/8" thick. The tile is either fissured or needle-perforated pattern			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1961-20	8/28/1961	"Lo-Tone Acoustical Tile" (12" x 12" x 5/8" thick)- an incombustible fire-retardant tile			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1961-19	8/16/1961	A fire-retardant, acoustical tile 12" x 12" x 3/4" thick, with either kerfed edges and different pattern or kerfed edges and fissured pattern, or 12" x 12" x 5/8" thick tile with tongue and grooves on two sides amd kerfed edges on the other two sides, and with a small random hole pattern, all three as listed under label service			C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1961-18	8/4/1961	Gold Bond, Fire-Shiled Solitude Grid Panels (24" x 48" by 5/8" thick)- a fire retardant, incombustible acoustical tile			C.479, Acts 1938 as amended Sec.116 (L)	Robert York

1961-17	7/25/1961	A Cementitious mixture designated a Type 1, 2, and 3, mixed with water and spray-applied directly to the beams and to the under surface of the steel floor units. Type 2 and 3 will be listed by the Underwriters as is presently listed Type 1 material "Cementitious Mixture"	Rescinded by CB#91	C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1961-16	7/6/1961	Natco Vitrilite "Fireproofer" Facing Tile to be used in bearing and nonbearing walls and partitions		C.479, Acts 1938 as amended Sec.116 (L) and Sec.2407	Robert York
1961-15	7/17/1961	Approval of Copper Tubes and Pipes for use in Plumbing		C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1961-14	6/28/1961	Armstrong Acoustical Fire Guard Lay in Units- a fire retardant, incombustible acoustical tile		C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1961-13	6/29/1961	Armstrong Acoustical Fire Guard- a fire retardant, incombustible acoustical tile		C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1961-12	6/28/1961	Armstrong Acoustical Fire Guard- a fire retardant, incombustible acoustical tile		C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1961-11	6/29/1961	Armstrong Acoustical Fire Guard- a fire retardant, incombustible acoustical tile		C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1961-10	6/29/1961	Armstrong Acoustical Fire Guard- a fire retardant, incombustible acoustical tile		C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1961-09	6/28/1961	Gold Bond Fire Shield Solitude Acoustical Tile- a fire retardant, incombustible tile		C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1961-08	6/23/1961	Gold Bond Fire Shield Solitude Acoustical Tile- a fire retardant, incombustible tile		C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1961-07	6/27/1961	Gold Bond Fire Shield Acoustiroc Acoustical Tile- a fire retardant, incombustible tile		C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1961-06	6/2/1961	"CAFECO-SPRAY" aka "Cafco Blaze-Shield"- a fire retardant incombustible material used to fire protect metal surfaces and composed of a mixture of mineral wool asbestos and cement	Rescinded by CB#95 (3/7/62)	C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1961-05	6/19/1961	"Master Column" - Concrete-filled columns		C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1961-04	5/25/1961	Compacted Concrete Pile known as "Franki Pile"		C.479, Acts 1938 as amended Sec.116 (L) and Sec.2908 of BBC	Robert York
1961-03	5/23/1961	Two hour Fire-Resistant Rating: 5/8" Gypsum Wallboard laminated in three layers, total thickness of 1-7/8"		C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1961-02	5/17/1961	"SPRAYCRAFT" - A Fire Retardant, Incombustible Material, used to fire-protect Metal Surfaces	Rescinded by CB#93	C.479, Acts 1938 as amended Sec.116 (L)	Robert York
1961-01	3/24/1961	"LO-TONE FR Mineral Acoustical Tile"- A Fire-Retardant, Incombustible Ceiling Tile		C.479, Acts 1938 as amended Sec.2201 & Sec.116, Paragraph (L)	Robert York
1960-07	10/25/1960	The Use of WRDA as a water-reducing admixture in structural concrete			Robert York
1960-06	8/31/1960	The Use of Perlite Gypsum Plaster or Vermiculite Gypsum for Fireproofing Structural Steel Members in Buildings		C.479, Acts 1938 as amended Sec.116, Paragraph "L"	Robert York
1960-05	5/31/1960	"PLACEWALL"- A liquid water reducing agent sold in two formulations. Placewall-W; which entrains air and Placewall-R; which entrains not over 1.5% air		C.479, Acts 1938 as amended Sec.116, Paragraph "L"	Robert York
1960-04	3/29/1960	Plain Porex Roof Slabs		C.479, Acts 1938 as amended Sec.116, Paragraph "L" of BBC	Robert York
1960-03	3/23/1960	Vinyl Plastic Lighting Panel (Trade name "Circlgrid")		C.479, Acts 1938 as amended Sec.116, Paragraph "L" of BBC	Robert York

Commissioners Bulletins

1960-02	2/1/1960	Tectum Roof Plank and Tectum Roof Tile			C.479, Acts 1938 as amended Sec.116, Paragraph "L" of BBC	Robert York
1960-01	1/5/1960	"SPRAYCRAFT"- A Fire Retardant Sprayed Directly in the Underside of Steel Floors, Roofs, & on the Beams Supporting them			C.479, Acts 1938 as amended Sec.116, Paragraph "L" of BBC	Thomas Hughes
1959-13	10/29/1959	"HAYDITE" Expanded Shale Lightweight Aggregate for Concrete use			C.479, Acts 1938 as amended Sec.116, Paragraph "L" of BBC	Thomas Hughes
1959-12	9/28/1959	"PYRACOTE" Vermiculite Plaster, a factory-mixed, setting type plaster for trowel or machine spray-on applications to steel surfaces			C.479, Acts 1938 as amended Sec.116, Paragraph "L" of BBC	Thomas Hughes
1959-11	9/17/1959	Double-Walled Insulated Metal Pipe Gas Vent, Type B-1		Supersedes CB #55 & #57	C.479, Acts 1938 as amended Sec.116, Paragraph "L" of BBC	Thomas Hughes
1959-10		Missing		Rescinded by CB #58		
1959-09	8/5/1959	"Strongbord" -Insulating Board Sheathing			C.479, Acts 1938 as amended Sec.116, Paragraph "L" of BBC	Thomas Hughes
1959-08		Missing		Rescinded by CB #58		
1959-07	7/7/1959	"Waylite" (Lightweight Aggregate for Concrete use)			C.479, Acts 1938 as amended Sec. 116, Paragraph "L"	Thomas Hughes
1959-06	5/26/1959	"Gold Bond Fire Shield Plaster" -A Fire-retardant Material Machine applied directly to the underside of Metal Deck Floors, Roofs, and to the Steel Beams Supporting them			C.479, Acts 1938 as amended Sec. 116, Paragraph "L" of BBC	Thomas Hughes
1959-05	5/21/1959	"Sprayed Limpet Asbestos"-A Fire-retardant Sprayed Directly on the under side of Steel Deck Floors, Roofs, and on the Beams Supporting them		Superseded by CB #124, #125, & #126	C.479, Acts 1938 as amended Sec. 116, Paragraph "L" of BBC	Thomas Hughes
1959-04	5/1/1959	Insulrock Slabs on Roof Decks and Insulrock Nonbearing Fireproof Partitions			C.479, Acts 1938 as amended Sec. 116, Paragraph "L" of BBC	Robert York
1959-03	3/2/1959	Copper Tubing for Water Supply Systems			C.479, Acts 1938 as amended Sec.116 (G)	Thomas Hughes
1959-02	2/10/1959	Norlite Aggregate			C.479, Acts 1938 as amended Sec. 116, Paragraph "L"	Thomas Hughes
1959-01	1/6/1959RI: 11	Approval for Flexicore Floor and Roof Slabs as developed by the Flexicore Company Inc.			C.479, Acts 1938 as amended Sec.116, Paragraph "L" of BBC	Robert York
1958-08	12/1/1958	Tufcor for use in Roof Construction			C.479, Acts 1938 as amended Sec. 116, Paragraph "L"	Thomas Hughes
1958-07	9/26/1958	Cofar for use in Reinforced Concrete Floor & Roof Construction			C.479, Acts 1938 as amended Sec. 116, Paragraph "L"	Thomas Hughes
1958-06	12/31/1958	Addendum to Bulletin #44: Added a manufacturer to approved steel cellular panels approved with the same conditions & provisos			C.479, Acts 1938 as amended Sec. 116, Paragraph "L"	Thomas Hughes
1958-05	6/5/1958	Authorization of Steel Cellular Panels & Sections for floors & Roofs as manufactured and engineered by six (6) manufacturers. Should they be listed?			C.479, Acts 1938 as amended Sec. 116, Paragraph "L" of BBC	Thomas Hughes
1958-04	5/1/1958	Zonolite brand Vermiculite is an insulating fireproof mineral form of mica used as an ingredient in a spray for fireproofing ceilings, by applying spray directly to metal			C.479, Acts 1938 as amended Sec. 116, Paragraph "L" of BBC	Thomas Hughes
1958-03	5/1/1958	CAFCO Spray: A Fire Retardant Sprayed Directly on the Underside of Steel Floors, Roofs, & Beams Supporting them			C.479, Acts 1938 as amended Sec. 116, Paragraph "L" of BBC	Thomas Hughes
1958-02	4/8/1958	Rockwell Tamperproof Gas Cock			C. 479, Acts 1938 as amended Sec. 116 (G) and 116 (L)	Thomas Hughes
1958-01	4/7/1958	Fesco Board Roof Insulation			C. 479, Acts 1938 as amended Sec. 116 (L) of BBC	Thomas Hughes
1957-02	3/22/1957	Lightweight Sectional Masonry Chimney Van Packer Corporation			C.479, Acts 1938 as amended Sec. 116, Paragraph "L" of BBC	Thomas Hughes

Commissioners Bulletins

1957-01						
1956-02	8/17/1956	Lawson Pre-Cast Concrete Plank			C. 479, Acts 1938 as amended Sec. 116, Paragraph "L"	Charles Callanan
1956-01	10/8/1956	Milcor Cellufloor and Milcor Steel Roof Deck			C.479, Acts 1938 as amended Sec. 116, Paragraph "L"	Charles Callanan
1955-02	1/6/1955	Partition Assembly, Non-Bearing USG TRUSSTEEL Stud.			C.479, Acts 1938 Boston Building Code Sect. 116(L) Boston Building Code Sect. 2201(h)	John Mahoney
1955-01	1/6/1955	Partition Assembly, Non-Bearing PYROBAR and Plaster			C.479, Acts 1938 Boston Building Code Sect. 116(L) Boston Building Code Sect. 2201(h)	John Mahoney
1951-01	4/16/1951	KILNOISE Acoustical Plaster				
1950-05	12/7/1950	Concrete Filled Columns			Boston Building Code Sect. 116(L)	John Mahoney
1950-04	10/19/1950	Super-Sico Structural Insulation			Boston Building Code Sect. 116(L)	John Mahoney
1950-03	10/19/1950	Durisol Soffit Blocks			Boston Building Code Sect. 116(L)	John Mahoney
1950-02	10/19/1950	Weldwood Composite Fire Door (Kaylo Core)			Boston Building Code Sect. 116(L)	John Mahoney
1950-01	6/23/1950	Vitroliner Prefabricated Flue, Type "E"			CB1946-05 / CB05	John Mahoney
1949-06	12/19/1949	2" Solid Rocklath and Plaster Partition			C.479, Acts 1938	John Mahoney
1949-05	8/25/1949	Kaylo Insulating Roof Tile			C.479, Acts 1938	John Mahoney
1949-04		Missing				
1949-03		Missing				
1949-02	8/25/1949	Larson Pre-Formed Waterproofing Units			C.479, Acts 1938	John Mahoney
1949-01	5/20/1949	Approval of the Use of LELITE Lightweight Aggregate			C.479, Acts 1938	John Mahoney
1948-03	12/30/1948	Approval of the Use of Cantilite Concrete Plank			C.479, Acts 1938	John Mahoney
1948-02	6/4/1948	Approval of the Use of Met-Cro Steel Cross Bridging			C.479, Acts 1938 Boston Building Code Sect. 2506(e)	John Mahoney
1948-01	5/26/1948	Approval for the Use of Fenestra Type "D" Building Panels			C.479, Acts 1938 Boston Building Code Sect. 28	John Mahoney
1947-02	11/7/1947	Cinder Concrete Building Units Manufactured by the Concrete Masonry Units Company			C.479, Acts 1938	John Mahoney
1947-01	11/7/1947	Concrete Building UNits Manufactured by the Concrete Masonry Units Company			C.479, Acts 1938	John Mahoney
1946-07	10/16/1946	Approval of Concrete Plank			C.479, Acts 1938	John Mahoney
1946-06	10/15/1946	Concrete Units Manufactured by the Concrete Products Company			C.479, Acts 1938	John Mahoney
1946-05	9/5/1946	Concrete Units Manufactured by the Newton Brick & Cement Company			C.479, Acts 1938	John Mahoney
1946-04	9/5/1946	Approval of Channelcrete Roof Slabs			C.479, Acts 1938	John Mahoney
1946-03	8/23/1946	Approval of Clapseal			C.479, Acts 1938	John Mahoney
1946-01	4/24/1946	Approval of Fire-Resistive Ratings			C.479, Acts 1938	John Mahoney
2001-01	2/14/2001	Boston Zoning Code Article 23 s.1; Off-street Parking Requirements with FAR of 6.0				Kevin Joyce
2001-02	4/5/2001	Special Operations Unit Established				Kevin Joyce
2001-03	4/25/2001	Guidelines for the Enforcement of the Site Cleanliness Ordinance in the City of Boston			CBC 9-9.8 780 CMR 3310.1	Kevin Joyce
2001-04	6/14/2001	Required Permits for All Site Work			BZC Art. 8, Sect. 8-7	Kevin Joyce
